NRW DDaT Initial Proposal Presentation
IBM Consulting and Stable Delivery Approach

IBM **Consulting**

Agenda

- Context and Purpose
- Understanding NRW
- Proposal Clarifications
- Customer Platform Approach
- Delivery and Governance
- Website Innovation
- Sustainability and Social Value
- Commercial Model
- Next Steps

Section 1: Context and Purpose

Transformation must balance ambition with operational

Purpose of this session

- Clarify our proposal
- Demonstrate understanding
- Explain delivery approach
- Provide transparency

Section 2: Understanding NRW

Four systemic challenges

Fragmented customer data

Point-to-point integration

Limited journey visibility

Manual reconciliation effort

Desired outcomes

- Consistent customer platform
- Improved data maturity
- Reduced complexity
- Sustainable capability

Implications for delivery

- Phased transformation
- Incremental architecture
- Integration before consolidation
- Capability embedded in delivery

Section 3: Proposal Clarifications

IBM and Stable model

Integrated delivery teams

Welsh-based capability

Bilingual alignment

Access to IBM scale

Transformation approach

- Product-led evolution
- Iterative delivery
- Strong governance
- Continuous knowledge transfer

Section 4: Customer Platform Approach

Discovery-led platform evolution

- Define roadmap and architecture
- Validate through multiple lenses
- Enable staged investment
- Support long-term delivery

Discovery workstreams

User and stakeholder discovery

Technical assessment

Architecture definition

Commercial shaping

Target platform architecture

- Decou
pled
engage

Data fragmentation approach

- Shared customer identifier
- Integration-based reconciliation
- Avoid early consolidation risk
- Progressive data improvement

Sequencing and risk

Identity first

Integration next

Consolidation later

Continuous validation

Section 5: Delivery and Governance

Delivery model

- Multidisciplinary teams
- Agile delivery practices
- Blended NRW collaboration
- Continuous knowledge transfer

Governance model

Strategic governance

Programme governance

Technical governance

Risk management

Key risks and mitigations

- Data quality challenges
- Legacy dependencies
- Profiling and validation
- Integration abstraction

Section 6: Website Innovation

12-week innovation window

- Hypothesis-led approach
- Focused experimentation
- Evidence-driven decisions
- Operate within constraints

Innovation phases

Explore

Ideate

Build

Scale or stop

Section 7: Sustainability and Social Value

Sustainability approach

- Cloud efficiency optimisation
- FinOps and GreenOps
- Carbon visibility
- Data for environmental insight

Social value in Wales

Welsh delivery presence

Local employment

Skills development

SME engagement

Section 8: Commercial Model

Commercial models

The model used depends on delivery phase and scope certainty.

Time and materials

Fixed price

Fixed capacity

Section 9: Next Steps

Next steps

- Refine scope
- Align priorities
- Confirm stakeholders
- Agree timelines

Thank you

Questions and discussion welcome
